EDUCATION

Kendriya Vidyalaya No.2 Kota, Rajasthan

Feb 2023

Higher Secondary School ,Percentage : 80%

Silver Oak University

Aug 2023 – July 2027

Bachelor in Computer Science in AI and ML ,GPA: 8.8

SKILLS

- **Languages** : Python, SQL, Java, JavaScript
- **Frameworks** : Pandas , Numpy , Scikit-Learn , Matplotlib , Flask, Computer Vision , EC2, Lambda , S3, IAM , MongoDB
- **Tools** : Power Bi , Tableau , MySQL , Excel , AWS Web Services
- **Stack** : MERN Stack

PROJECTS

Full Stack Ecommerce Website ([Github Link](#))

June 2025

- Built a sleek, responsive e-commerce web app using React.js for the frontend and Node.js/Express with MongoDB in the backend, offering seamless browsing, cart management, checkout, and real-time order tracking.
(Features: user auth, product listing, filters, add-to-cart, checkout, orders, real-time status)
- Integrated Razor pay (and Stripe) APIs to enable smooth online payments and ensure a reliable transaction flow for customers.
- Developed a protected admin dashboard allowing product and order management, including adding/deleting items and updating delivery status—all in real time from a secure route.
- Optimized app performance and backend queries to ensure fast load times, smooth navigation, and a glitch-free shopping experience even under heavy user traffic.

Secure File Crypt ([Github Link](#))

June 2025

- Developed a secure, browser-based file encryption and decryption tool using Flask (Python) to let users safely upload and download files without relying on cloud or third-party servers.
- Implemented core encryption logic with Fernet symmetric cryptography, ensuring confidentiality of various file types (PDF, TXT, DOCX, etc.) via unique user-generated keys.
- Built a clean and intuitive user interface using Flask templates for seamless file upload/download operations, with clear structure and code organization (main.py, encryptor.py, utils.py, templates, uploads folder).

CERTIFICATIONS

Machine Learning Hackathon ([Certificate](#))

Feb 2024

- Participation in the Machine Learning Hackathon at Silver Oak University, developing and deploying predictive models using NumPy, TensorFlow, and Matplotlib to solve real-world business analysis challenges.

Data Analytics Job Simulation – Deloitte ([Certificate](#))

June 2025

- Completed Deloitte's Data Analytics Job Simulation, applying statistical analysis, logical data modeling, and Tableau dashboards to deliver actionable business insights from complex datasets.
